**TIMKEN**

**Premium All-Purpose Industrial Grease**
Lithium-complex, thickened grease designed for a variety of light- to medium-duty industrial applications that operate at higher-than-average temperatures and loads.

**Features:**
- Solid protection against rust and corrosion
- Excellent protection against wear
- 55 lb Timken “OK” load
- Carries the NLGI GC-LB rating for the most stringent operating conditions

**Applications:**
- On- and off-road applications
- Wheel bearings
- Axles
- Ball joints
- U-joints
- Power takeoffs
- Bushings
- High-speed equipment
- Crankshafts
- Connecting rods
- Motor bearings
- Heavy-duty industrial bushings/Ball Joints
- Components that demand heavy-duty lubrication

**NLGI No. 2**

**TIMKEN**

**Synthetic Industrial Grease**

**Features:**
- Contains extreme pressure and antitrust additives
- Helps to inhibit corrosion

**Applications:**
- Industrial
- Construction
- Agriculture
- Automotive

**NLGI No. 1.5**

**Timken Grease Selection Flowchart – Application**

**Zeniplex® Multi-Purpose Grease**

Zeniplex® EP grease is a high performance aluminum complex extreme pressure grease with excellent mechanical stability, oxidation resistance and anti-wear characteristics. Resistant to heat, moisture and most chemicals, formulated for use in tough, wet, hot applications.

**Features:**
- Water resistant
- High temperature
- Meets NSF H2
- NSF H1

**Applications:**
- Marine
- Food processing
- Textile/nanowms
- Chemical manufacture
- Heavy industry
- Idler pulleys
- Electric motors
- Paper mills
- Agriculture
- Alternators
- Generators
- Idler pulleys
- Electric motors
- Fans/pumps
- Lightweight pillow blocks
- Idler pulleys
- Chemical manufacturing
- Noise sensitive applications
- Oven conveyors

**Molykote™ G-4500 Multi-Purpose Synthetic Grease**

Synthetic, PAO oil-based NLGI No. 2 G-4500 formulation includes an aluminum complex thickener, along with PTFE and other fortifiers for moderate loads at higher speeds.

**Features:**
- Well-suited for equipment in food processing, textile/nonwovens manufacturing and other white grease applications
- Designed for bearings, mixers, motors or conveyors on low and high temperature equipment, packaging and other equipment
- Meets FDA regulation 21 CFR 178.3570 H1
- NSF H1

**Applications:**
- Construction/Off-Road
- Power Generation
- Fleet Equipment
- Aluminum Mills
- Earth Moving Equipment
- Construction and heavy equipment
- Steel mills
- Rock Quarry
- Agriculture
- Paper mills
- Power takeoffs
- Automotive
- U-joints
- Washers
- Electric motor
- Off-highway
- Lightly loaded pillow blocks
- Ball bearings
- Noise sensitive applications
- Oven conveyors

**The Original PB Penetrating Grease**

A high-quality synthetic grease harnessing the power of the original PB B’Laster, creating a time-release penetrating action. This unique combination has the ability to penetrate existing rust and corrosion, but also stays on metal surfaces longer than conventional greases, providing long-lasting lubrication and protection against rust and corrosion. Great for equipment in farm and agriculture, landscaping, construction, mining and automotive industries. Also great for restoration and on anything rusted or corroded.

**Features:**
- High-quality synthetic grease
- Time-release penetrating action
- Superior grease fitting lubrication and protection

**Applications:**
- Chemical manufacture
- Heavy industry
- Idler pulleys
- Electric motors
- Paper mills
- Agriculture
- Alternators
- Generators
- Idler pulleys
- Electric motors
- Fans/pumps
- Lightweight pillow blocks
- Idler pulleys
- Chemical manufacturing
- Noise sensitive applications
- Oven conveyors
