Pneumatic Couplings

Quick disconnect couplers and matching nipples are available in a variety of standards, such as industrial interchange, ARO 210/310 interchange and automotive. Universal couplers fit nipples of multiple standards.

---

**Industrial Interchange Coupler & Plug**

D-Series: Convenient, automatic, one-handed connection and safe disconnection. Reverse-acting sleeve to prevent accidental disconnection and prevent whip during disconnection.

F-Series: Sleeve-guard "lip" to reduce the risk of accidental disconnection while in service. High concentration of locking balls reduces incidents of brinneling during operation.

DF-Series: Plugs will work with both 'D' and 'F' series as well as other makes of pneumatic industrial interchange couplers.

---

### Universal couplers fit nipples of multiple standards.
